

Downloading axisReader to an iOS Apple Device

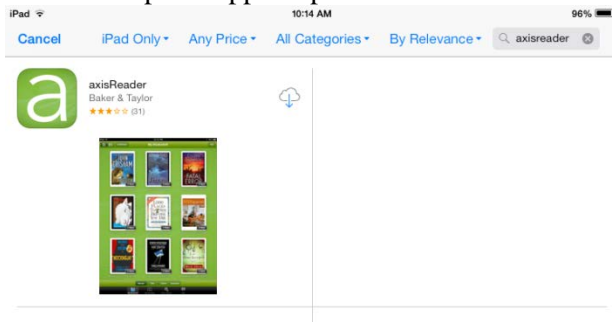

1. Begin by opening the Apple App store on your device.

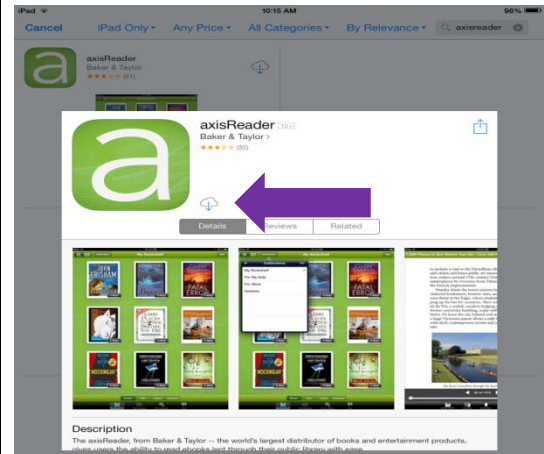

2. In the Search bar at the top right, type in Axis Reader. Then click Search.

3. The axisReader app will be a green square with a white "a" in it. Tap this app to open an info screen.

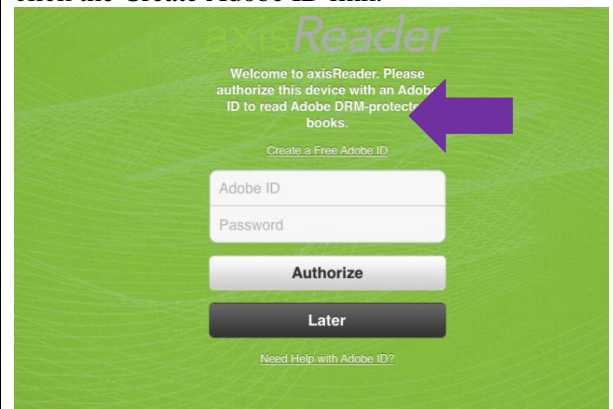

4. On the info screen, tap the download icon to download the axisReader app. This looks like a little cloud with an arrow.

5. Once the app is finished downloading, return to your home screen and look for the new icon.

6. Tap this icon to open axisReader and authorize it with an Adobe ID and password. If you already have an Adobe ID and password, enter that and click Authorize. If you need an ID and password, click the Create Adobe ID link.

Downloading axisReader to an iOS Apple Device

7. To create an Adobe ID and password, just complete the requested information and click the Create button.

8. Then you'll return to axisReader, enter your newly created ID and password, and click Authorize.

9. Once you have authorized Adobe, you are ready to visit your library's page and check out books! Click the Find a Library button to locate your library's Magic Wall.

10. You can type your library into the Search bar or click Browse to locate your library from a list.

11. Once you've located your library, you can tap the green plus sign to bookmark it.

12. Now that you've bookmarked your library, it will show up immediately when you tap the Find a Library button. Tap the name of your library to enter the Magic Wall.

Congratulations! You're reading to start exploring the collection and checking out items. Happy reading!
